Industry Trend and Development

Due to various reasons the economic, financial and industrial policies of the Government are currently less conducive to economic growth of the Country. As a result the market of shares and securities have become volatile. Unless the business environment improves the economic development is likely to be sluggish. The monetary and fiscal policies of Reserve Bank of India may have favourable influence on the market conditions but it is not yet certain to what extent the market will react to the changes.

Opportunities and Threats

Being a small NBFC, the Company has very limited opportunity for growth but threats are plenty. Any unusual happening whether within the country or elsewhere in the world may have adverse impact on the business of the Company and often these happen so suddenly that management hardly gets time to take corrective action.

Risk and Concern

The Company's nature of business being dependent on market conditions the management is often caught unaware of sudden upheaval in the economy. This may cause severe damage to the Company's profitability before any corrective action is taken.

Outlook

The management is constantly engaged in shuffling its investment portfolio to avoid impact of adverse market condition. The economic and fiscal policies of the Government and Reserve Bank of India may have a favourable bearing on the Company's business but the Management must be constantly alert to address changed condition.

PLENTY VALLEY INTRA LIMITED
